■ ***Location***

Pleasantville, New
York

■ ***Total Project Cost***

\$617,801.00

Nanahagan Park is located on Lake Street. Nanahagan Park has playground equipment, a walking trail, basketball courts, and a pond for fishing. The restoration of Nanahagen Pond included approximately 7,500 cu. Yd. of sediment removal including installation of approximately 1500 lin. Ft. of pond maintenance by-pass piping and complete drainage of the pond. Construction vehicles were loaded with removed material for on-site disposal and capping.

The project required the planting emergent vegetation.

Additional construction included construction of access road and bridge, and minor re-grading of the site.

PCI provided the engineering design permit and construction drawings as well as construction administration and supervision during the construction phase to ensure a timely and under budget completion of the project.
