

Penns Grove Sewerage Authority, Authority Engineer

Design Data

Owner

Penns Grove Sewerage Authority, New Jersey

Location

Penns Grove, New Jersey

Plant Features

(2) 30-foot diameter Steel Final Clarifiers

750 GPD activated sludge plant

We have served Penns Grove Sewerage Authority as the Authority Engineer for over twelve years. The plant (PGSA) is a 750 GPD activated sludge plant with aerobic digesters, sludge thickeners, grit facilities, primary and secondary facilities. Penns Grove Sewerage Treatment Plant is located within the borough in Salem County, New Jersey. The borough's population served by the plant is approximately 5,150. We have completed many plant upgrades including the installation of (2) 30-foot diameter steel final clarifiers.
